

Established in 1978 and still operated today by Ken and Pam Jackson, Jackson Sheet Metal manufactures a very diverse range of products which have included aluminium fishing boats, log burners, switch board cabinets, domestic meter boxes plus many bespoke products to individual order. Growth in the inquiries for sheets of punched metal products resulted in the formation of Perforated Sheet Specialists in 1995 which was followed in 2002 by Perforated Design & Products who produce a wide range of finished product using the punched metal sheet.

Our extensive experience in working with and fabricating metal products has led to our identifying the need for a stylish, modular system to deal with electrical and data trunking in both new buildings and renovations.

Jackson Sheetmetal Power & Data Cable Trunking

Welcome to the JSM range of CAT6 data cable compatible trunking solutions, a modular system which provides a stylish finish to blend with modern architecture while achieving the functionality of easy onsite installation.

Our modular system provides solutions for all horizontal skirting applications, vertical wall mounted fittings or ceiling suspended trunking, we have a solution for any trunking installation. Not only practical, but compatible with most interior designs, simply select a colour from our powder coated range, or choose from a natural "mill" or "anodized" finish. Whichever you select we are confident of having a finish which will blend with the building's interior design.

With 3 size options and all the components to be able to assemble on site the JSM trunking system offers a complete data cabling solution.

JSM 80/80 Trunking

JSM - 8080 (MF, PC or ANO)

- Overall dimensions of 80mm x80mm, single compartment.
- 3.000 and 6.000mtr Standard stocked lengths.
- Suits Standard Power or data sockets.
- Cat 6 data compatible
- Complete range of prefabricated fitting available.
- Custom components can be fabricated with ease.
- Mill Finish (MF), Powder coated (PC) or Anodised (ANO).
- Proudly New Zealand Made.

JSM 152/60 Trunking

JSM - 15260 (MF, PC or ANO)

- Overall dimensions of 152mm x60mm, equally sized compartments.
- 3.000mtr Standard stocked length. (Longer or Shorter lengths available upon request)
- Suits Standard Power or data sockets.
- Cat 6 data compatible
- Unique inner gusset enabling site cut fittings giving a prefabricated finish.
- Complete range of prefabricated fitting also available.
- Custom components can be fabricated with ease.
- Mill Finish (MF), Powder coated (PC) or Anodised (ANO).
- Proudly New Zealand Made.

JSM 180/60 Trunking

JSM - 18060 (MF, PC or ANO)

- Overall dimensions of 180mm x60mm, equally sized compartments.
- 3.000mtr Standard stocked length. (Longer or Shorter lengths available upon request)
- Suits Standard Power or data sockets.
- Cat 6 data compatible
- Unique inner gusset enabling site cut fittings giving a prefabricated finish.
- Complete range of prefabricated fitting also available.
- Custom components can be fabricated with ease.
- Mill Finish (MF), Powder coated (PC) or Anodised (ANO).
- Proudly New Zealand Made.

JSM 80/80 Service Post

JSM - 8080 SP (3 or 6)

- Overall dimensions of 80mm x80mm.
- 3.000 and 6.000mtr Standard stocked lengths.
- Removable central divider for same face fixing of Power and Data sockets while maintaining cable separation.
- Suits Standard Power or data sockets.
- Cat 6 data compatible
- Mill Finish (MF), Powder coated (PC) or Anodised (ANO).
